Reveal your #AuditHero

Dr. Angela Puffett, Consultant Physician at Withybush General Hospital.

Why are they an audit hero?

Dr. Puffett is heavily involved in the clinical audit, service improvement and Quality Improvement within Withybush General hospital. Her abilities and passion are evident through the many improvements that have been made since she was appointed as Consultant Physician (Care of the Elderly) in August 2015.

When Dr Puffett first started she said 'the general medicine role is principally for patients of all ages but with an additional focus on improving and developing services for older people in Pembrokeshire.

Dr Puffett said: "Our plans involve rapid access to multidisciplinary assessment for older people who need speedy diagnostic and support services but not necessarily admission to hospital. Alongside this we will be improving access to comprehensive geriatric assessment for inpatients – an evidence based, person centred intervention which improves outcomes for older people."

Dr Puffett has certainly strived to accomplish this as well as a number of other accomplishments such as her team winning a Welsh speaking award recently.
