

Nominal Group Technique: Voting Card

Instructions: once all of the unique ideas have been transcribed onto the ballot paper, then each member of the group will be given a voting card allowing them to cast their votes independently and anonymously. Each voter has the opportunity to make three selections and these selections are ranked in the following order: first choice (3 points), second choice (2 points) and third choice (1 point). Once all votes have been cast the facilitator collects all ballot papers and calculates the result.

	Idea selected: ballot paper number and brief details
1st choice (3 points)	
2nd choice (2 points)	
3rd choice (1 point)
